Buea, CM

About

Software Engineer with expertise in frontend development and backend exposure. Skilled in HTML5, CSS3, Tailwind, JavaScript, TypeScript, React, Next.js, React Native, Firebase, WordPress, and Figma. Passionate about building responsive web and mobile applications, delivering clean code, and continuously learning to drive innovative solutions.

Work Experience

Frontend Developer Aug 2024 - Jun 2025 Loop Technologies CO LTD Buea, Southwest Region, Cameroon

Contributed to the development of scalable, production-ready web applications, focusing on full UI design, frontend engineering, and seamless API integration across multiple projects.

- Designed and developed the LOOPEats food delivery web app from scratch, handling the full UI/UX design, frontend implementation, and API integration for restaurant listings, order flow, and authentication.
- Led the design and frontend implementation of Dunamis IT, an e-commerce and service-booking platform for tech products and IT services, ensuring a responsive and modern user interface.
- Designed and implemented the AidSync ticket-support platform frontend, featuring real-time chat, notifications, and payment integration, connecting clients and engineers in a task-based workflow.
- Collaborated with backend developers to integrate REST APIs and ensure smooth deployment and performance optimization across all projects.

Software Engineer (Internship)

OpenTek

May 2024 - Feb 2025

Yaoundé, Centre Region, Cameroon

Handled end-to-end software development across the full stack, contributing to the architecture, design, and implementation of enterprise systems.

- Led the development of the Human Resource module for a large-scale ERP system, managing both frontend (React, Tailwind) and backend (Node.js, Express, PostgreSQL) processes.

- Designed and implemented APIs, authentication flows, and employee management features from scratch.
- Contributed to the full software lifecycle from database design and server logic to frontend integration, testing, and deployment.
- Collaborated within an agile team, ensuring scalability, maintainability, and adherence to best coding practices.

Frontend developer

Staruth Technologies

Jul 2023 - Dec 2025

Buea, Southwest Region, Cameroon

Collaborating on the design and development of modern, responsive web applications, with a focus on performance, accessibility, and user experience.

- Contributed to the Staruth official website, translating UI designs into clean, efficient, and scalable frontend components.
- Worked on Reepls, a writing and publishing platform, developing the web version collaboratively and enhancing UI/UX flow and key interactive features.
- Contributed in the development of Reepls mobile app implemented using react native with expo.
- Utilized React, React native, Tailwind CSS, and Figma for efficient component design and implementation.
