About

Software engineer with a Computer Engineering background, specializing in frontend architecture with hands-on full-stack exposure across REST APIs, Node.js, PostgreSQL, and cloud platforms.

Work Experience

Software Engineer (Intern) May 2024 - Nov 2024
Loop Technologies Buea, South West Region, Cameroon

- Designed maintainable frontend systems, translating UX requirements into reliable web applications.
- Integrated backend services via RESTful APIs, implementing real-time interactions and authentication flows.
- Rebuilt the Loop Technologies company website, improving visual design, page performance, and client contact flow.

Full Stack Engineer (Intern) Jul 2024 - Feb 2025
OpenTek Yaoundé, Centre Region, Cameroon

- Led the development of a Human Resource Management module for a large-scale ERP system.
- Architected frontend interfaces, backend services, and PostgreSQL database integrations
- Designed and implemented RESTful APIs, authentication mechanisms, and core business logic using Node.js, Express, and PostgreSQL.
- Collaborated in an agile team across the full software development lifecycle.

Frontend Engineer Jul 2023 - Feb 2025
Staruth Technologies Buea, South West Region, Cameroon

- Built and maintained responsive web and mobile interfaces for client-facing products, focusing on performance and usability.
- Worked on Reepls, a writing and publishing platform, developing interactive UI features for both web and React Native mobile versions.
- Translated Figma designs to clean, reusable component systems and collaborated with backend developers on API integration.

Projects

AidSync
Feb 2025 – CURRENT
B2B platform connecting clients(users with IT challenges) to IT engineers, built end-to-end with real-time chat, notifications, and payment integration. https://aidsync.io

LoopEats
Nov 2024 – CURRENT
Food delivery web app covering restaurant listings, cart flow, and user authentication. https://dev.loopeats.com/

JayTechHub
Sep 2025 - Mar 2026
Bilingual (EN/FR) technical guides blog and web tools platform built with Next.js and markdowns, making use of static site generation (SSG), for speed and performance. https://jaytechhub.com/en

QuickerFill
Jan 2026 - Jan 2026
Chrome extension that auto-fills forms with realistic mock data, built to speed up developer and QA engineers testing workflows. https://quickerfill.vercel.app/

Ledgr
Oct 2025 - Dec 2025
Mobile expense tracker with full CRUD, auth, and Redis rate-limited backend APIs. Frontend Repo and Backend Repo

Skills

- **Programming :** JavaScript, Typescript, C, C++.
- **Web & Systems:** React, Next.js, Node.js, Express, REST APIs, Firebase, React Native.
- **Databases:** PostgreSQL, MySQL, MongoDB.
- **Tools:** Git, GitHub, Docker, Postman, Vercel, Netlify, figma.

Education

BEng. Computer Engineering Oct 2021 - Dec 2025
University of Buea Buea, Southwest Region, Cameroon

Languages

- **English** (Native – full working proficiency)
- **French** (Intermediate)
