Buea, CM

About

Software engineer with a background in Computer Engineering and a focus on frontend architecture. Experienced building production web and mobile applications for real clients, owning projects from Figma design through to deployment. Comfortable integrating REST APIs and backend services, with growing full-stack exposure across Node.js, PostgreSQL, and cloud platforms.

Work Experience

Software Engineer (Intern) May 2024 - Nov 2024
Loop Technologies Buea, South West Region, Cameroon

- Designed maintainable frontend systems, translating UX requirements into reliable web applications.
- Integrated backend services via RESTful APIs, implementing real-time interactions and authentication flows.
- Collaborated closely with backend engineers and product stakeholders to ensure system reliability, performance, and smooth deployment.

Full Stack Engineer (Intern) Jul 2024 - Feb 2025
OpenTek Yaoundé, Centre Region, Cameroon

- Led the development of a Human Resource Management module for a large-scale ERP system.
- Architected frontend interfaces, backend services, and PostgreSQL database integrations
- Designed and implemented RESTful APIs, authentication mechanisms, and core business logic using Node.js, Express, and PostgreSQL.
- Collaborated in an agile team across the full software development lifecycle.

Frontend Engineer Jul 2023 - Feb 2025
Staruth Technologies Buea, South West Region, Cameroon

- Built and maintained responsive web and mobile interfaces for client-facing products, focusing on performance and usability.
- Worked on Reepls, a writing and publishing platform, developing interactive UI features for both web and React Native mobile versions.
- Translated UI/UX designs into clean, reusable component systems and collaborated with backend developers on API integration.

Projects

AidSync Web Application

CURRENT

Full frontend from Figma design to deployment, supporting real-time chat, notifications, and payment flows connecting clients and engineers. https://aidsync.io

LoopEats (Food delivery web application)

CURRENT

Designed and built a complete food delivery web app covering restaurant listings, order flow, and user authentication. https://dev.loopeats.com/

Lost Image matching app (Lost2Found)

Jul 2024 - Oct 2024

Mobile app using image recognition to help users identify and recover lost items.

JayTechHub Blog

Sep 2025 - Jan 2026

Personal technical blog website, publishing articles in both English and French (Multilingual), covering android tech guides, fixes and tutorials. https://jaytechhub.com/en

QuickerFill Extension (Personal tool)

Jan 2026

A browser extension that auto-fills forms with realistic mock data to speed up developer and QA testing workflows. https://quickerfill.com/

Skills

- **Programming :** JavaScript, TypeScript, C, C++.
- **Web & Systems:** React, Next.js, Node.js, Express, REST APIs, Firebase, React Native.
- **Databases:** PostgreSQL, MySQL, MongoDB.
- **Tools:** Git, GitHub, Docker, Postman, Vercel, Netlify, figma.

Education

BEng. Computer Engineering Oct 2021 - July 2025
University of Buea Buea, Southwest Region, Cameroon

Languages

- **English** (Native – full working proficiency)
- **French** (Intermediate)
