ABOUT

Highly skilled Software Engineer specializing in frontend development with robust full-stack capabilities, adept at leveraging modern technologies like React, Next.js, and Node.js to build scalable, production-ready web and mobile applications. Proven ability to deliver responsive UI/UX designs, integrate complex APIs, and optimize performance across diverse projects, consistently driving innovative solutions and clean code practices. Eager to contribute expertise in developing high-impact, user-centric software solutions that enhance operational efficiency and user engagement.

WORK EXPERIENCE

Frontend developer

Staruth Technologies   Jul 2023 - Dec 2025, Buea, Southwest Region, Cameroon

Collaborated on the design and development of modern, highly responsive web applications, focusing on optimizing performance, accessibility, and user experience for various platforms.

- Translated complex UI designs into clean, efficient, and scalable frontend components for the Staruth official website, significantly improving user interface quality and responsiveness.
- Developed the web version of Reepls, a writing and publishing platform, enhancing UI/UX flow and key interactive features through collaborative development efforts.
- Contributed to the development of the Reepls mobile application using React Native with Expo, extending platform accessibility and user engagement across mobile devices.
- Leveraged React, React Native, Tailwind CSS, and Figma to streamline efficient component design and implementation, ensuring consistency and responsiveness across web and mobile interfaces.

Frontend Developer

Loop Technologies CO LTD   Aug 2024 - Jun 2025, Buea, Southwest Region, Cameroon

Drove end-to-end development of scalable, production-ready web applications, leading UI/UX design, frontend engineering, and seamless API integration across multiple high-impact projects.

- Spearheaded the complete UI/UX design, frontend implementation, and API integration for the LOOPEats food delivery web app, establishing core functionalities for restaurant listings, order processing, and secure authentication from inception.
- Led the comprehensive design and frontend implementation of Dunamis IT, an e-commerce and service-booking platform, delivering a highly responsive and modern user interface that enhanced accessibility and user engagement.
- Developed and deployed the AidSync ticket-support platform frontend, incorporating real-time chat, notifications, and secure payment integration to streamline client-engineer collaboration and task management.
- Collaborated closely with backend teams to integrate REST APIs, optimizing deployment pipelines and enhancing application performance across multiple projects for seamless user experiences.

Software Engineer (Internship)

OpenTek   May 2024 - Feb 2025, Yaoundé, Centre Region, Cameroon

Executed end-to-end full-stack software development, actively contributing to the architectural design and implementation of critical enterprise resource planning (ERP) systems.

- Directed the full-stack development of a Human Resource module for a large-scale ERP system, managing frontend (React, Tailwind) and backend (Node.js, Express, PostgreSQL) processes to deliver core HR functionalities.
- Architected and implemented robust APIs, secure authentication flows, and comprehensive employee management features from the ground up, enhancing system functionality and security.
- Contributed across the entire software development lifecycle, from database design and server-side logic to frontend integration, rigorous testing, and successful deployment of enterprise solutions.

- Collaborated effectively within an agile development environment, ensuring solutions met high standards for scalability, maintainability, and adherence to best coding practices.

PROJECTS

JC Wisdom construction website
Sep 2025 - Sep 2025

Developed a modern and responsive building and construction company website for JC-wisdom-constructions.

AidSync (Support and Freelance platform)
May 2025 - Jul 2025

Built the full design and frontend implementation of a real-time support and freelance collaboration platform.

LoopEats (Food delivery web app)
Mar 2025 - Apr 2025

Designed and developed a responsive food delivery platform for restaurants and customers, handling end-to-end implementation.

Portfolio Website
Jul 2023 - Aug 2024

Created a personal portfolio website to showcase projects and skills, featuring dynamic project display and responsiveness.

Dunamis IT (Tech E-commerce website)
Feb 2024 - Mar 2024

Developed a modern and responsive e-commerce website for tech products and IT services for Dunamis IT.

EDUCATION

Computer Engineering
• University of Buea - Buea, Southwest Region, Cameroon • Oct 2021 - Jul 2025

General Studies
• GBHS Limbe - Limbe, Southwest Region, Cameroon • Sep 2020 - Jun 2021

General Studies
• GHS Mbonjo Limbe - Limbe, Southwest Region, Cameroon • Sep 2017 - Jun 2019

SKILLS

Frontend Development | Next.js, HTML5, CSS3, JavaScript, React, TypeScript, TailwindCSS, React Native, UI/UX Design (Figma), Responsive Design, WordPress

Backend Development | Node.js, Express.js, REST APIs, Firebase

Databases | MySQL, MongoDB, PostgreSQL, Prisma, Firebase

Version Control | Git, GitHub, Vercel, Netlify

Cloud Platforms | Google Cloud, Cloud Storage, Azure

Project Management | Agile Methodologies, Scrum, Jira, Trello

Programming Languages & Tools | C, C++, XAMPP, Docker, Python, VS Code, Postman

Soft Skills | Software Testing & Debugging, Problem-solving, Communication, Teamwork, Quick Learner, Adaptability, Technical Documentation

LANGUAGES

(Native)
